We Believe in Transparency

1. Frictionless Staking

Hold and Earn System. Anyone holding the token will receive rewards, MONKS works by applying 2% of the 3% fee to each transaction and instantly splitting that fee among all holders of the token. Holders do not need to stake or wait for fees to be delivered. Fees are awarded by the smart contract and are immediately reflected in the holder's balance.

2. Tokenomic

Maximum Supply 100,000,000

- 5,000,000 Seed Sale \$0.005, 25% at TGE 75% linear for 6 months**
- 5,000,000 Private Sale \$0.03, 25% at TGE 75% linear for 8 months**
- 20,000,000 Public Sale \$0.06 unlocked at listing**
- 5,000,000 Liquidity**
- 15,000,000 Marketing**
- 21,500,000 Ecosystem Development 1 year lock**
- 10,000,000 Team Tokens locked for 1 year**
- 16,500,000 Token Burn every 2 months for 10 months**
- 2,000,000 Airdrop**

No additional minting and all rewards will come from the token tax. Each transaction made on MONKS tokens will incur a 3% tax on all transactions. For example, sending 100 \$MONKS from wallet A to wallet B will have wallet B receiving net 97 \$MONKS tokens. 2% goes to Regular Holders 1% goes to Liquidity Pool Providers.

3. Burning Chamber

1. Coin/Token burning is the process of permanently removing coins from circulation, reducing the total supply.
2. After Token listing every two months, MonkeyWorld token team will be burning \$MONKS.
3. 3.3 Million \$MONKS tokens will be sent to the burn address (0x00dead) after 2 month of launch for 10 months to burn 16,500,000 token supply.

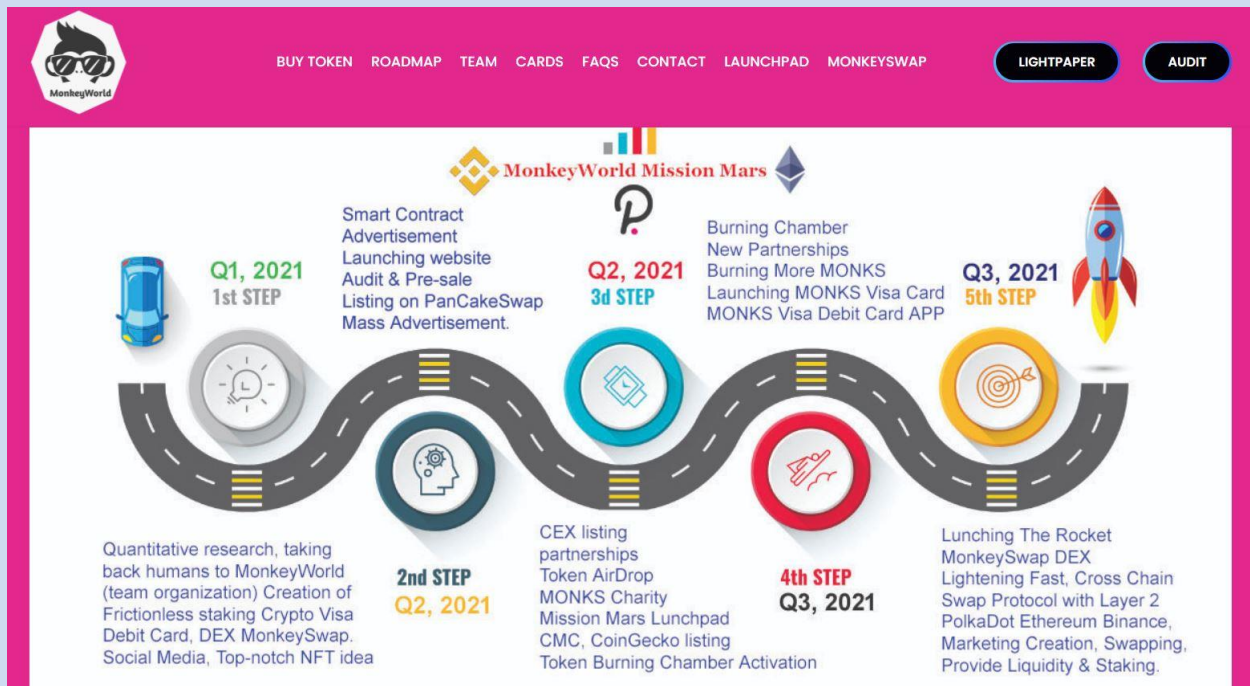

This unique function will Boost \$MONKS Value.

Token Burning Chamber

No additional minting

5. Visa Credit Card

Is the Monkeyworld.io Visa Card a credit or debit card?

The Monkeyworld.io Visa Card is a prepaid card. Broadly speaking, prepaid cards are the same as debit cards. The difference is that debit cards are linked to your bank account, but prepaid cards need to be topped up. In our case, you can top up using bank account transfers, other credit/debit cards, or cryptocurrency.

How do I apply for a Monkeyworld.io Visa Card?

You need to stake \$MONKS tokens for a period of 180 days to apply for a Monkeyworld.io Visa Card. To do so, first sign up for a Monkeyworld.io App account and complete our KYC verification. Next, purchase \$MONKS tokens and deposit them into your Crypto Wallet in the App. The amount of \$MONKS depends on the card tier you're applying for. Finally, go to the 'Card' tab in the App, select your desired \$MONKS Visa Card, tap the 'Stake \$MONKS' button, and follow the on-screen instructions. Now, all you need to do is wait for us to notify you when your card has shipped!

How do I top-up my card?

You can top up your card using your Fiat Wallet, Crypto Wallet, or credit/debit card in the Monkeyworld.io App. Go to the 'Card' tab, tap 'Top Up', and select your preferred method. Please visit our Help Centre for more information about how to set up your Fiat Wallet.

Which exchange rate will you use?

We have competitive exchange rates for both fiat and cryptocurrencies. The exact rates depend on your jurisdiction and card tier. We will provide all these details in the Monkeyworld.io

Information about fees and limits (i.e., free ATM withdrawals, interbank exchange rates, top-ups, etc.) can be found in the 'Fees & Limits' section under 'Settings' in the Monkeyworld.io App. Fees vary by card tier, so be sure you're checking the correct one.

4. MonkeySwap DEX

MonkeySwap is Decentralized protocol for swapping digital assets and tokens, open-source project. There are many decentralized exchanges which provide the ability to swap your tokens but MonkeySwap is the best place for Swapping, Providing Liquidity & Staking your assets. Currently many decentralized exchanges have tried to solve the problem of centralized exchange platforms however, they're unable to provide the liquidity. Decentralized exchanges with these inherent problems make it difficult to push for mass adoption.

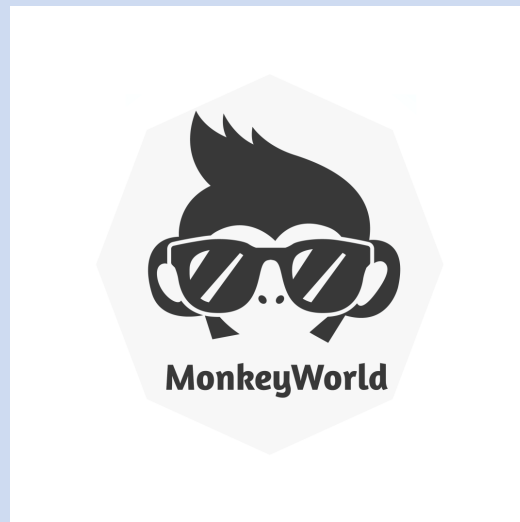

MonkeySwap is a decentralized marketplace for providing liquidity and earning while you stake. There is no need for central party or central order book to assist in performing transactions. It secures Automated liquidity and permits the utilization of MonkeySwap without requiring orders or any centralization.

We've developed and built a liquidity pool that will replace the need of an order book, it is powered by liquidity providers. Liquidity providers will earn a portion of the fee charged for swap and other protocol transactions. The rate of any asset will be determined by the constant product formula. Every user of Ethereum blockchain can add the liquidity by providing BNB or any other BEP-20 Tokens. The framework gives a decentralized pricing instrument that basically smooths the profundity of the order books.

Users can swap their BNB/Tokens with any other Token they want. User don't need to trust any central exchange or anybody with their money. User can also earn fee by staking/Providing liquidity. Whenever Users Stake/Provide Liquidity, they'll earn fee according to the share of pool. This protocol is completely decentralized for trading and by utilizing layer 2 scaling integrated with Polkadot, this will offer faster transactions at an exponential rate and also cheaper transaction fees.

You can essentially make any BSC based token and it will be added on MonkeySwap without the need for any approval. You can add the liquidity in a pool by adding the equivalent amount of BNB & any BEP-20 tokens. After providing the liquidity in the pool now you're eligible for earning fees. Your fee share will be accumulated in the pool and you'll get your fee share according to the ratio you want to withdraw. Whenever you remove the liquidity from the pool, you'll receive equal percentage of the fee.

For additional clarity and transparency, MonkeySwap isn't a related to Uniswap nor the any other Decentralized exchange in the market right now. Although, MonkeySwap uses some of the general similar coding methodologies.

Enjoy the Fruits of MonkeyWorld
